(415) 205-9558 - RAFATAKASU@GMAIL.COM

#### **EDUCATION**

# COLUMBIA UNIVERSITY - Bachelor of Eng. in COMPUTER SCIENCE, 3.5 GPA

MAY 2017

Focus on Artificial Intelligence, App Development, and Computer Science Theory

#### **EXPERIENCE**

## TECHNOLOGY CONSULTING, EXPERIENCED ASSOCIATE, PWC

JULY 2017

 PwC's Advisory practice focused on Application and Emerging Technologies in the Healthcare Industry - NOW

#### TECHNICAL PRODUCT MANAGER, MAJOR HEALTHCARE CLIENT

- Operated as the TPM for one of the company's mobile development teams, serving as the point of reference for technical decisions regarding architectural design or implementation
- Served as the technical representation of the development team on meetings with the client business stakeholders
- Executed the delivery of iOS and Android features by coordinating an agile team of multiple developers and testers

#### INNOVATION LEAD, MAJOR HEALTHCARE CLIENT

- Designed and prototyped a voice assistant for the client's mobile application, using speech-recognition tools and cloud-based Natural Language Processing
- Presented the prototype to the client's top executives, resulting in funding to a feature that will be deployed to millions of members

# TECHNOLOGY CONSULTING, INTERNSHIP, PWC

### JUNE - AUG 2016

# APP DEVELOPER, IMMIGRATION LAW FIRM CLIENT

Developed an Android mobile application that used the device's native GPS capabilities to allow the Law Firm's clients to easily "check-in" their location during their immigration applications

#### JUNE - SEPT

2015

- SOFTWARE DEVELOPER, INTERNSHIP, ANHEUSER-BUSCH INBEV

  Developed an iOS application, "beHoppy", in Objective-C that used computer vision to scan beer labels and allow users to log and rate beers. Users could search in application's database (Ruby on Rails backend) for beer taste profiles and ratings.
- Presented the internship project to C-level executives, who funded the development of the Android counterpart. The app was released in both app stores and gained thousands of active users per month.

### SOFTWARE DEVELOPER, INTERNSHIP, ROCKET INTERNET

JUNE - OCT

Developed an iOS application (Cordova) for one of Rocket Internet's eCommerce startups, Airu. The app integrated with the eCommerce's APIs to download recent sales promotions and allowed users to quickly cycle though these promotions in a "tinderstyle" stack of cards. 2014

## PROJECTS AND AFFILIATIONS

## HACKATHON WINNER, HACK4DIVERSITY, JULY 2016

 Developed a social network (Bootstrap frontend + Django backend) that connects users based on their musical taste in an effort to eliminate racial bias on online social networks

## CODE2040 FELLOW, JANUARY 2016 - AUG 2016

- Selected for Code2040's 2016 Fellowship class

## LANGUAGES AND TOOLS

- Python, JavaScript, Objective-C, Java, C, C++, MATLAB, OCaml
